DR. Emmett Barnett D.V.M 479-637-3082 Waldron, AR 72950 (My Attending Veterinarian)			
Description of Contract Between Elainea Allen DBA Yorkies by Elainea and the Customer that is posted above		Mail: Elainea Allen 10767 Oak Lawn RD, Parks, AR 72950 This contract must be signed by Customer and their attending Veterinarian within the first two days of arrival of puppy and sent back to Elainea Allen.	
FEED AND HELPFUL HINTS ON EATING: Eukanuba Puppy Small Breed is their feed. I leave it out all the time for puppies and adults. This is all I have ever fed. When a puppy arrives to your home they may be stressed a little and don't want to eat. Remember Eating is very important at this point. You might have to blend their puppy feed a little and add about a teaspoon of table sugar to it. Or try some yogurt or cream of chicken soup, or chicken or tuna fish, check for bones in tuna. Nutra Stat will be sent in the puppy package with the puppy. The Low Sugar sheet will help you determine the signs of Low sugar cause from not eating. The sheet on Hypoglycemia is very important.			

You must have your puppy examined by a licensed veterinarian of your choice within the first 2 days of receiving your new yorkie puppy. If your yorkie puppy, in the opinion of your Veterinarian, has any physical problems, that are life threatening, I will provide you with a healthy replacement puppy or refund. NOT BOTH. Shipping not included. All pages of the Vet Report must be signed by you, the customer and your attending veterinarian after the examination within the first 48 hours of arrival. Failure to have the yorkie puppy Vet Checked and contracts sent back to Elainea Allen will VOID all future refunds or replacements.

To make a claim for a replacement puppy or refund for the purchase price, you must notify Yorkies by Elainea, at the first signs of any problems. The puppy must be taken to your attending veterinarian. You must bring a signed statement from your veterinarian showing the date on which the puppy was examined and stating why the puppy is a poor health risk. This statement must include a description of the symptoms to support the opinion. This guarantee does not include Hypoglycemia (Low Sugar or Sugar Shock.) Or allergic reaction of any kind of shots. At any time during the first twelve months of age if the puppy needs medical attention for a birth defect, then the amount that would or could be paid by me would be up to the price you have paid me for the puppy itself, not including shipping. Or you can send me the puppy back for a replacement puppy. All shipping would be at your expense. Failure to have the puppy examined within the first two days will void this contract and no refund or exchange will be allowed.

The Vet report must be signed by you the customer and your attending Veterinarian to keep this contract in effect. The customer can make a copy to keep for their records and send the original back to me, Elainea Allen, 10767 Oak Lawn RD, Parks, AR 72950.

There is no guarantee that this puppy will be show quality, breeding quality, color or size. My Yorkies are sold as Pet only. I don't guarantee that this puppy will come house trained; I don't guarantee that this yorkie will be compatible to you or your house hold. If children are in the house, I do not guarantee that this puppy will be safe from harm, from holding, grabbing, and mess handling in any way. If a customer buys a puppy that isn't perfect, the imperfections of this puppy will be disclosed to you by me and vet report and you are buying a puppy as is with this slight defect. Nothing life threatening or that will hinder the normal play of the yorkie will be sold. If you are returning a puppy, you must return any registration forms, and a signature signing the puppy back over to me, if a signature is required. Shipping at your expense. Yorkies by Elainea is not responsible for any payments of Veterinarians fees for examinations, drugs, x-rays or other medical treatment. In case of death a Necropsy will need to be performed and sent to the state lab to determine the official cause of death. This Necropsy report will need to be faxed to my attending Veterinarian, DR. Emmett Barnett D.V.M. 479-637-3082.

The first 48 hours are very important. Get your Yorkie Puppy Vet checked and get those Contract Papers sent back to me. All puppies are registered American's Pet Registry, INC. or American Kennel Club upon request.
